

DATA & ANALYTICS

Our service offering

From insight to impact: data-driven strategy with TriFinance

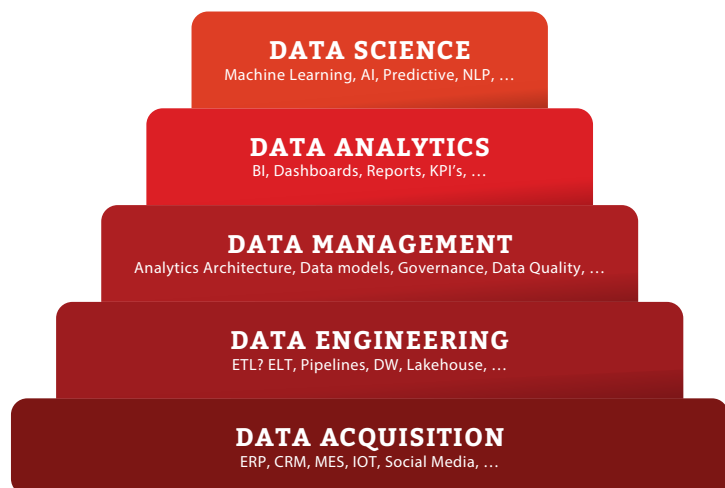

Data is crucial for your business strategy. Seen as an asset, it requires a well-planned strategy and the right infrastructure. Data is the engine of your finance transformation journey and turns the Finance function into a trusted business partner. The need for data organization will only increase and with evolving technology it is now within reach for everyone across the organization.

How we can support you

Our experts have extensive expertise in Data and Analytics, and managerial reporting. They design efficient analytics architectures, identify performance indicators that are vital to your business, and utilize modern analytics solutions to unlock new insights.

This unique combination of functional and technical expertise facilitates effective communication with business and IT, leveraging the quality and the speed of a Data and Analytics project.

Our offering is built around this pyramid

A data-driven organization reaps the benefits of turning data into actionable insights

Maarten Lauwaert
Expert Practice Lead TriFinance

We offer a unique combination of services, combining intelligent capacity, pragmatic advisory and implementation, people solutions and training.

1

Data Strategy and Data & Analytics Architecture

We define your future-proof data strategy aligned with your strategic objectives by assessing the value of data for your company and by identifying data & analytics topics that will create value for your business. We define the to-be architecture for your data organization, processes, and systems and create a roadmap for implementing this data strategy.

2

Design and Implementation of a Data & Analytics Architecture

By conducting both business & functional analysis, we develop the best practice design of a new analytics architecture, data models and dashboards. We design and implement a Data and Analytics Architecture in Azure and Power BI and provide you with a detailed budget estimation, project management with delivery responsibility and we ensure well-documented and governed solutions by your team.

3

Data Science Projects

Our team specializes in designing and implementing predictive models through machine learning. Utilize advanced analytics for tasks like data quality analysis, outlier detection, and churn prediction. Beyond implementation, we analyze and interpret the outcomes of machine learning models, providing valuable insights to refine and elevate your business decision-making processes.

4

Coaching, Audits and Support

Your key users can be coached by our experts to improve existing models or explore new scopes. Benefit from thorough reviews of your current analytics architecture and Power BI design.

5

Outsourcing Solutions

You can staff your analytics team with consultants of varying expertise levels in Microsoft BI. We maintain, expand, and support your analytics setup flexibly, tailored to your evolving needs.

6

Training Initiatives

Our Data & Analytics Training Program covers a diversity of topics, from beginner to expert levels, enhancing your skills in Power BI, Fabric, DAX and Excel.

7

Support

We offer business support on your Power BI reports using our ticketing system according to a set of possible SLA's.

8

Kick-starting reporting models

We developed a kickstart model for SMEs (MyInsights) and Local governments (MATiz). You will not have to start from scratch. As our models contain different modules, you can tailor them to your personal needs.
